

## ONGOING PROJECTS OF RRA NETWORK

- ▲ Study on Policy Issues on Effective Implementation of PMFBY (10 Partners)
- A Pilot Project on System of Crop Intensification (SCI) in Rainfed Region (6 Partners)

## STRATEGY TO INCREASE PUBLIC INVESTMENTS IN RAINFED AREAS

Build comprehensive investments based on the thematic recommendations in convergence with Department of Agriculture, Horticulture, Fisheries, and Animal Husbandry

Synthesise, document and showcase the best practices from the thematic investments

Design and deliver mainstream programmes on rainfed areas

Building capacities of young professionals on rainfed agenda

Stakeholder consultations on rainfed policy issues in collaboration with network members and regional network chapters

Provide inputs to state and national policy making committees to affect the nature, amount and delivery of public investments on rainfed agriculture

Promote macro-economic research on rainfed agriculture

Establish a data analytics service at Indian School of Business (ISB) Hyderabad, which is available to all members, researchers and academicians

Reconfiguring Public Policies & Investments for Ease of Doing Agriculture in Rainfed Areas

## RAINFED AREAS ARE CHARACTERISED BY

Major **poverty landscape** of India **overlaps with rainfed areas** with high **density of tribal population**

## CONTRIBUTION OF RAINFED AGRICULTURE

**Inspite** of the **large contribution** to production, agriculture **policies and programs exclude rainfed areas** at the design stage

## THE NETWORK

In this context, NGOs, academia, bankers, donors, and others concerned with rainfed agriculture and areas came together to form the Revitalising Rainfed Agriculture Network (RRAN) with the

**VISION: To facilitate the establishment of productive and resilient rainfed agriculture systems**

**MISSION: To affect the nature, amount and delivery of public investments for the establishment of productive and resilient rainfed agriculture.**

## 10 THEMATIC PROPOSITIONS OF RRA NETWORK

## CURRENT STRATEGY
